

Welcome Screen

When the editor starts a Welcome Screen will be shown to let you choose a game template or an empty project

- **Empty Project** — An empty new project
- **Simple Project** — A first person game with ground and sky. This project especially fits to open world first person or parkour first person games.
- **Flappy Bird Project** — The popular flappy bird game. You can edit the levels, choose your own background and change the bird to another model.
- **Labyrinth Project** — A demonstration of a LABYRINTH game. You can edit and add more levels.
- **Ball Adventure Game Project** — Ball adventure game. You can edit and add more levels, change the textures and add obstacles.
- **Landscape Project** — A first person exploring terrain game. You can edit the terrain, change the terrain's texture and add stuff.
- **Card Matching Project** — A card matching game project. You can change the texture of the card, the background and the titles.
- **Car Demo Project** — A simple car game with a track. You can build your own track and change the car model. You can also add some objective like getting to the checkpoint in time or add opponents with simple AI.
- **Third Person Adventure Project**

- Character Adventure Game Project
- FPS Game Project
